SUMMARY

Full-Stack Developer with 2+ years of experience building web applications, REST APIs, data pipelines, and AI-powered solutions using Python, React, FastAPI, SQL, and JavaScript. Experienced in developing AI agents, integrating LLM APIs such as Claude, Gemini, and Grok, and building data-driven automation workflows. Strong in backend development, databases, API integration, and scalable software solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL, HTML, CSS

Frontend: React, JavaScript, HTML, CSS, Tailwind CSS

Backend: FastAPI, Flask, Django, ASP.NET, REST APIs

Databases: MySQL, SQLite, MongoDB, SQLAlchemy

AI / LLM: Claude API, Gemini API, Groq API, LangChain, Hugging Face, AI Agents

Data / Automation: Pandas, NumPy, BeautifulSoup, n8n, ETL Pipelines

Tools: Git, GitHub, Power BI, Tableau, MS SQL Server, Excel, Jupyter Notebook, Google Colab

EXPERIENCE

Associate Software Engineer

Oct 2025 – Present

Bhatia Brothers FZE

Mumbai, India

- Developed **AI-powered Inventory and Lead Generation Agents** using Python, LLM APIs, and data-processing pipelines to automate inventory analysis, lead discovery, and business recommendations.
- Integrated **Claude and Grok APIs** into AI workflows for automated data extraction, classification, analysis, and intelligent business insights.
- Prepared **MIRE, business analysis, and management reports** while handling CRM data preparation, validation, KPI analysis, historical data consolidation, and reporting to support inventory planning and sales decision-making.

Junior Software Developer

Jun 2024 – May 2025

VIVA Software Solution

Mumbai, India

- Managed database operations including CRUD functionality, schema modifications, and performance tuning.
- Deployed real-time code updates and hotfixes on live production websites hosted on GoDaddy.
- Optimized SQL queries to reduce data load time by 35% and developed 10+ dynamic Web Forms including a smart search feature for retrieving live information.

PROJECTS

Lead Generation Agent – AI-Powered B2B Lead Generation Platform | [GitHub](#)

Technologies: React, TypeScript, Python, FastAPI, AI

- Developed an **AI-powered B2B Lead Generation Agent** using React, TypeScript, Python, and FastAPI to discover, extract, validate, and enrich business leads.
- Automated **lead discovery, market research, data enrichment, and email outreach** to streamline prospecting and scalable lead generation.

AI-Powered Learning Roadmap Generator | [GitHub](#)

Technologies: Python, Flask, Groq API, React, Tailwind

- Built an **AI-driven learning platform** using Python, Flask, React, and Groq API to generate personalized learning roadmaps and aggregate resources from 5+ platforms through concurrent pipelines and intelligent failover.
- Optimized application performance using **parallel fetching and caching**, achieving response times under 2 seconds and 95%+ uptime with a responsive React and Tailwind frontend.

MovieDiary – Personal Movie Tracker API | [GitHub](#)

Technologies: Python, FastAPI, SQLite, SQLAlchemy

- Developed a RESTful API using FastAPI to allow users to log movies with ratings and reviews.
- Implemented CRUD operations with database integration and tested endpoints using Swagger UI.

EDUCATION

Master of Science in Computer Science | CGPA: 7.97

2023 – 2025

University of Mumbai

Mumbai, India

Bachelor of Science in Information Technology | CGPA: 7.72

2020 – 2023

University of Mumbai

Mumbai, India

CERTIFICATIONS
